

Collage City scapes

You will need

- Old magazines
- Glue
- Large cartridge paper
- Your imagination

1) Plan a design; this can be done on a separate piece of paper. You can plan a city, a garden, animals, anything that interests you.

2) Go through the magazines and cut out all of the patterns, colours and pictures that fit with the picture that you would like to create.

3) Start planning where your cut outs will go before you start gluing

4) Once you are satisfied that you have got a good idea where you want your clippings to go, start gluing, remember start with the background and end with the foreground.

Once you have finished you can laminate your masterpiece and hang it up on your wall
