

Leaf Print Butterflies

You will need

- Kitchen sponge
- newspaper
- Paints
- Coloured card and white paper
- Glue
- Assortment of leaves

1) Place the kitchen sponge on the newspaper, place some paint on the sponge and spread it out.

2) Take a leaf and push it down onto the paint, gently lift it off and press it down onto the white paper. Gently lift it off. You have your first butterfly wing. Repeat until you have four wings. Allow to dry.

3) While your wings are drying draw a butterfly body on the coloured card.

4) Once your wings are dry cut them out and glue them on to the body.

5) To make the antennas cut a thin strip of card, cut in half and wind around a pencil, this will make a curly antenna.
